

# ASF

SENSOR

The Alarm Sensor Fitting Sensor is a very economical solution for product loss prevention in many plastic and paper product applications such as extrusion, molding, and film manufacturing. The PVC fitting attaches quickly to standard piping and contains a frangible graphite rod, which activates the sensor upon overpressure.

*The ASF is Oseco's solution to prevent product loss.*

# LPSF

SENSOR

This Low-Pressure Sensor, Flanged, is designed for use with our VAPRO and POSIPRO disks in applications not requiring sanitary service.

*The LPSF is Oseco's low-pressure sensor for bi directional disks*

# AMX

SENSOR

The All-Metal Sensor, Extra-Strength, is rated for higher pressure for more demanding applications, such as pressure fluctuations in manifold and discharge lines.

*The AMX is Oseco's Extra-Strength All-Metal Sensor for demanding applications.*
